Classic Cases

YD is located in Hangzhou Lin ping Economic Development Zone, a national economic development zone. It is a service-oriented manufacturing enterprise with more than 30 years of rich experience, integrating R&D, production, and sales.

In the domestic market, it has established eight sales companies in Beijing, Shanghai Hangzhou, Jinan, Fuzhou, Guangzhou, Hunan, and Jiangxi, and set up general agents in Shenyang, Anhui, Xinjiang, and other places. The company's products have been exported to more than 70 overseas countries including Germany, the United States, France, Russia, the Netherlands, the United Arab Emirates, Saudi Arabia, Egypt and Colombia. YD, LED secondary has passed ISO9001: 2015 quality management system certification, ISO14001: 2015 environmental management system certification, OHSAS18001: 2007 occupational health and safety management system certification, with completely independent intellectual property rights LED secondary LED Double Protection Technology, and its products have obtained UL, CE, FCC, BIS, CB and other international certifications. YD has become a well-known brand in the lighting industry at home and abroad with its high-quality products, advanced technology, and business philosophy and complete pre-sales and after-sales services.

ABOUT US/

SERVICE /

DESIGN SERVICE

We possess an excellent design and enormous design experience, we have rendered helps to our customers to complete many lighting projects in more than 70 over countries world wide.

TECHNICAL SERVICE

We possess an excellent technical support with enormous guidance experience, and we have provided pre-sales, after sales technical services to our customers from many countries, we can also provide on site technical guidance and support.

We do not take over projects directly domestic and overseas.

ADVANTAGE /

LED DOUBLE PROTECTION TECHNOLOGY

Independent R&D completed intellectual property Obtained multiple national patents Product ingress protection grade: IP68.

INTELLIGENT CONTROL TECHNOLOGY

LED lighting intelligent control system Body-Interactive control system AI interactive lighting control system Combined with 5G-AI technology, certain results are achieved through continuous in-depth research.

39 YEARS EXPERIENCE IN LANDSCAPE LIGHTING

38 years industry rooted and technology accumulation 20,000+ projects, 70+ countries. Comprehensive service system.

Independently researched by Hangzhou YD Illumination company, YD "Double Protection Technology" enjoys absolutely independent intellectual property and obtains more than 100 patents for national invention and patent right for utility model and design. and it enjoys the right of patent in China, USA and Germany.

In 2012, approved the certificates of Zhejiang Provincial Appraisal of the New Products.

In 2013, listed in the "National Torch Plan" , registered as Zhejiang Scientific technological achievements in the same year. Won several Hangzhou city excellent awards for new products and new technology.

R&D SUPPORT /

ENTERPRISE HONOR /

YD has completed independent intellectual property rights of the Double Protection Technology to ensure that products used in outdoor possess excellent performance.

Protect Grade IP68 Fireproof Grade V-0 Anti-UV Test

Impact Test Salt Spray Test UL Certification

CE Certification FCC Certification BIS Certification CB Certification

PRODUCT FEATURES /

IP68

Ingress protection grade IP68, can be used under-water 100m.

V-0

Flame retardant grade V-0, from the fire self-extinguishing.

ANTI-UV

Pass Anti-UV Test, can be used outdoors for 10 years, not self-cracking and significant discoloration.

ANTI-SALT SPRAY

It can be used in marine environment by salt spray detection.

-40℃

Moscow skating rink ice under the use of the lowest temperature -40℃.

IK10

LED could sustain for the free fall deep impact test for 3.5kg hammer from 1.2 meter height.

Waterproof grade achieves IP68

(The highest protection grade)

- Products passed 100m underwater testing

Customized Service Supporting

- Good quality with long lifespan, Flexible design, operation and installation.
- Provide customized service and solution base on customers’ request.
- To achieve customers’ any different requirements.

Performance passed severe environment testing

- Can work very well underwater with high pressure.
- Can work very well in -40°C cold weather and 55°C hot weather.
- It achieves grade 4 UV resistance, the housing material can be worked well more than 10 years for outdoor

YD-DG-20

LED Point Light

- This product is small in size, exquisite in appearance, transparent and ultra-thin and can be used indoors and outdoors.
- Mainly used to outline the outline of buildings that require hidden installation; small outdoor lamps with built-in light sources; small high-precision indoor and outdoor LED advertising displays; It also as indoor decorative light sources.

Specification

LED Color	RGB/RGB+W/R/G/B/W...
Weight	8.8g/set
Beam Angle	160°
Outer Shell Material	Transparent flame retardant RPVC
Size	φ21x15mm
Environment	Outdoor

YD-DG-50

LED Point Light

- This product of this specification is a larger LED point light source with higher brightness and a control lable light source with red, green and blue colors.
- It is mainly used for landscape lighting of large buildings;buried landscape lighting in parks; large outline mirrors; also can produce large advertising displays, large city signs and text sources;swim ming pools, fountains, aquariums and other underwater landscape lighting.

Specification

LED Color	RGB/RGB+W/B+W/R/G/B/W...

YD-XT-40A

P31

- Light weight aluminum alloy luminaire housing.
- Oxidized surface, resulting in high wear resistance and corrosion resistance as well as weather resistance.
- Built-in modular light source, the protection grade reaches IP68
- When the luminaire is installed, no additional slot is needed, which is convenient for installation and maintenance.

YD-XT-18A

LED Linear Light

- The LED light shell adopts surface-oxidized extruded aluminum profile.
- The width of light body is narrow to make it possible to be used in smaller structures.
- The fixture of the light adopts clip-in structure design to make it convenient for customer to install.
- The LED light shell adopts H-shape design to facilitate wiring during on-site installation.
- This LED light is an ultra-narrow, delicate appearance LED linear light with excellent lighting performance not only in the night but also in the daytime.

Specification

LED Color	RGB/RGB+W/R/G/B/W...

Product Details

YD-XT-25A

LED Linear Light

- This aluminum led linear lamp is inner built in XT-25B led linear light source.
- The aluminum profile and wire groove is integrated design and no need to add extra wire groove.
- By adopting new style fixture, the installation of the led linear light is very convenient and the lamp can keep excellent and high grade daytime appearance.
- The lamp has several designs like static single color, RGB etc.
- And can create dynamic lighting effects by cooperating with control system.

Specification

LED Color	B+W/RGB/RGB+W/R/G/B/W...

Product Details

YD-XT-40A

LED Linear Light

- This linear light uses XT-25B as the linear source installed into aluminum wire groove.
- The length of aluminum wire groove can be customized according to customer's requirement.
- The aluminum wire groove can be wiring groove and light body, the light body and wire groove combines well, hardly impact the daytime effect of the building.
- It can be directly showed as single color (normally on I,also controlled by offline machine (with SD card)to show RGB full color.

Double Protection Material Waterproof Technology

- Protection starts from the light source, Ingress Protection reaches IP68

Nano thermal material

- Improved the thermal conduction and heat dissipation performance of the chip

Lens External Technology

- Combined with the double protection waterproof material with temperature resistance above 200°C
- Effectively solved the problem of light control and distribution

Excellent Projection Effect

- Can customize the color according to different scenes and needs

Shell Color Can Be Customized

- Uniform illumination, far projection distance

YD-DT-120

LED High Power Floodlight

- This led floodlight enjoys creative, small and beautiful shape that adopted die casting aluminum material.
- The aluminum profile color can be designed by customer preferences and it's high cost effective choice.
- The inner light source module adopted double protection technology and achieves IP68 highest protection grade.
- It can achieve uniform lighting effects, far distance flooding lighting effects and mainly used in outdoor
- landscape, building advertising, huge architecture, huge bridge guardrail.

YD-DT-295

LED High Power Floodlight

- This LED product is small in size, it's appearance is fine and it is transparent and very thin.
- It can be used both indoor and outdoor, even under 20m water.
- With the application of YD double protection encapsulation technology, it is fireproof.
- It is used to lightening the contour of buildings, or as the built-in light source for outdoor lights, or used to make high accuracy indoor LED screen.
- It can be controlled by computer to show real time images, texts, videos etc.

P51

- The luminair use a light barrier structure, the wall washing effect is even and significant
- Built-in modular light source, the protection grade reaches IP68
- Aluminum alloy luminair housing and cable are integrated design, no additional slot is required for installation, and production, installation and maintenance are very convenient.
- Product fixtures can be adjusted according to the actual application needs of the project, thus showing different wall washing effects.
- It has high outdoor weather resistance, good flame retardancy, high and low temperature resistance, etc.
- According to its characteristics, it can be applied to various application such as buildings, bridges, scenic spots, parks, river banks lighting and so on.

YD-XQ-18C

LED Wall Washer

- This ultra narrow 8 thin and delicate appearance wall washer can hardly impact daytime effect of the building after installation.
- It is a good option of concealed wall washer.
- Built-in XT-18 Double Protection linear light source, the light reaches Protect Grade IP68;
- can directly work underwater, underground, and outdoor.

YD-TP-15

P61

- High transparent rate, it hardly affects the internal lighting of the building during the day.
Convenient installation, wide application
- Double protection LED light source adopt the high flame retardant materials, protection grade IP68.
- Outdoor UV resistance, high flame retardant, high and low temperature resistance.
Suitable for all kinds of large outdoor public places, as well as the exterior of high-rise buildings.

YD-XSP-20

LED Steel Mesh

- This screen use 1.5 mm stainless steel wire mesh and $\Phi 20$ LED fixtyres to fix LED lights, the minimum center distance of two lights is 5 cm.
- This screen is with easy installation, maintenance, and easy transportation.
- It is mainly applied to all kinds of outdoor LED screen.
- It can transmit real time image, text, video by connecting to computer, it can also be controlled by single controller or offline controller with SD card.

Specification

LED Color	RGB...
Weight	2616g/set
Beam Angle	120°
Outer Shell Material	Die-cast aluminum+RPVC
Size	1000mm×1097mm×93mm (customizable)
Environment	Outdoor

Point light source fixed base

YD-WP-20

LED Steel Mesh

- This display is a LED pixel screen composed of point light sources, which is mainly used for outdoor large advertising screens.
- It has excellent pixel lighting effect and high brightness in the daytime and at night.
- It can achieve RGB full color dynamic effect. With grid design, good permeability, effectively reduce wind resistance, applicable to all kinds of large outdoor public places and high-rise buildings facade.

Specification

LED Color	RGB...
Weight	15000g/set
Beam Angle	110°、115°
Outer Shell Material	Die-cast aluminum+RPVC
Size	998mm×1000mm×25mm (customizable)
Environment	Outdoor

INTELLIGENT LIGHTING CONTROL SYSTEM

In 1995, YD Illumination got national invention patent for self developed Neon Light's parallel single-chip control system. In 2001, YD Illumination entered the field of outdoor led control system and led lights research and production and was the first company who developed and researched RGB dynamic control system, control software, dynamic lighting design software. From RGB control system to intelligent engagement cloud platform, YD Illumination has been dedicated in combining lighting products with modern technology and expanding new pathway and new field for lighting applications to promote lighting industry's green and low carbon development.

Smart lighting management cloud platform

- Intelligent lighting
- Intelligent Strong Power
- Intelligent Security
- Intelligent Pole
- Intelligent AI interaction

Intelligent Interactive Control System

- Smart Running Trails Interactive Lighting Control System
- Shake and Voice Interactive Control System
- Smart Interactive Lighting Control System by Mobile
- Golf Interactive Lighting Control System
- Infrared Interactive Control System
- Voice Interactive Control System
- Ferris Wheel Rotating Control System
- Environmental Interactive Control System
- Bicycle Interactive Control System
- Somatosensory Interactive Control System

Classic Intelligent Control System

- Single Control System
- Offline Control System
- Online Control System

SMART LIGHTING MANAGEMENT CLOUD PLATFORM

Introduction of Control System

The intelligent lighting management cloud platform V5.0 independently developed by YD Illumination is based on the Internet of Things technology, with the control center as the core and the intelligent controller as the focus, integrating wireless communication technology, computer control technology, edge computing technology, geographic A city-level smart management cloud platform for information system technology. It can realize functions such as smart lighting, smart power, smart security, smart light poles, and AI interaction.

The platform integrates the needs of urban lighting project managers and municipal managers, and can effectively realize the circulation and integration of lighting system information, visualize urban lighting construction, and make operation and management more efficient. At the same time, managers can conduct intelligent monitoring and analysis through the digital large screen to help managers solve a series of problems in lighting management and operation and maintenance in lighting projects. The platform also supports access to the city brain supervision center to jointly build a new ecology of smart cities!

System function/features

Data Control Cabin: The priority of intelligent lighting. As the core of intelligent lighting's command and control, it displays its core data in dynamic and visualized way by GIS map, 3D model, figure, supervisory control and provides direct reference for manager's policy making.

Intelligent Lighting: It can achieve centralized accurate control for podium building lighting, sound device and preset various lighting modes. By combination with artificial intelligent calculation, it can achieve lighting synchronized control.

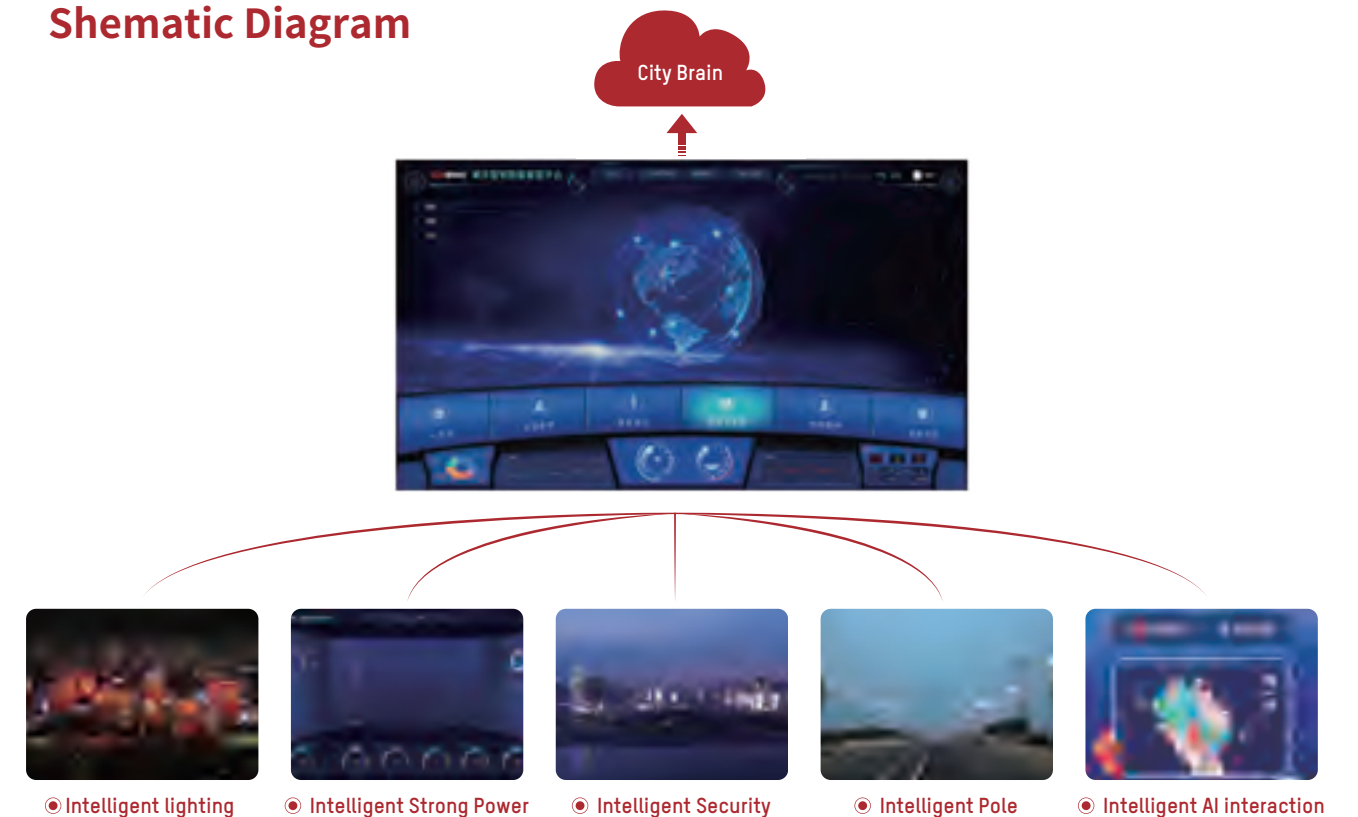

Intelligent Strong Power : It has functions like landscape lighting's control, collection of operating data, fault diagnosis and etc. It can help power consumption monitoring at real time and accurate statistics of different nodes in lighting show and thus providing scientific data foundation and strong decision support energy saving and self improving in lighting show.

Intelligent Security: It can remotely connect cameras, build a visual scheduling system, monitor lighting scenes in real time, assist scientific and accurate decision-making, improve problem discovery efficiency, and improve operation and maintenance efficiency.

Smart light pole: With the smart light pole as the core, multiple subsystems are constructed, including intelligent lighting application system, environmental monitoring system, multimedia information release system, WIFI coverage system, one-key recourse system, charging pile management system, video monitoring system, etc.

AI Interaction: Based on the Internet of Things, it can realize the control of all kinds of light interaction, it could upload the required interactive materials with one click, switch intelligent scenes, and could conduct interactive data analysis based on big data, etc., supporting the seamless connection between intelligent scene interaction and lighting interpretation.

Schematic Diagram

INTELLIGENT INTERACTIVE CONTROL SYSTEM

SMART LIGHTING RUNWAY INTERACTIVE CONTROL SYSTEM

The intelligent running trails lighting with interactive control system is based on ultra-efficient sensing technology and mobile Internet technology. It is a lighting control system used in sports venues such as running trails. Running light can track human movement in real time, support single and multiple people to participate in running interaction at the same time, with a strong sense of competition and participation. The system has a strong social nature and supports participants to share their running results to the circle of friends with one click, and also supports viewing historical running data, running rankings, etc. The management can view relevant data such as the number of participants, and conduct intelligent analysis and management of big data.

System Feature

- Interaction between people and light at real time
- Checking running data at real time
- Strong competitiveness and sociability

Application scenario

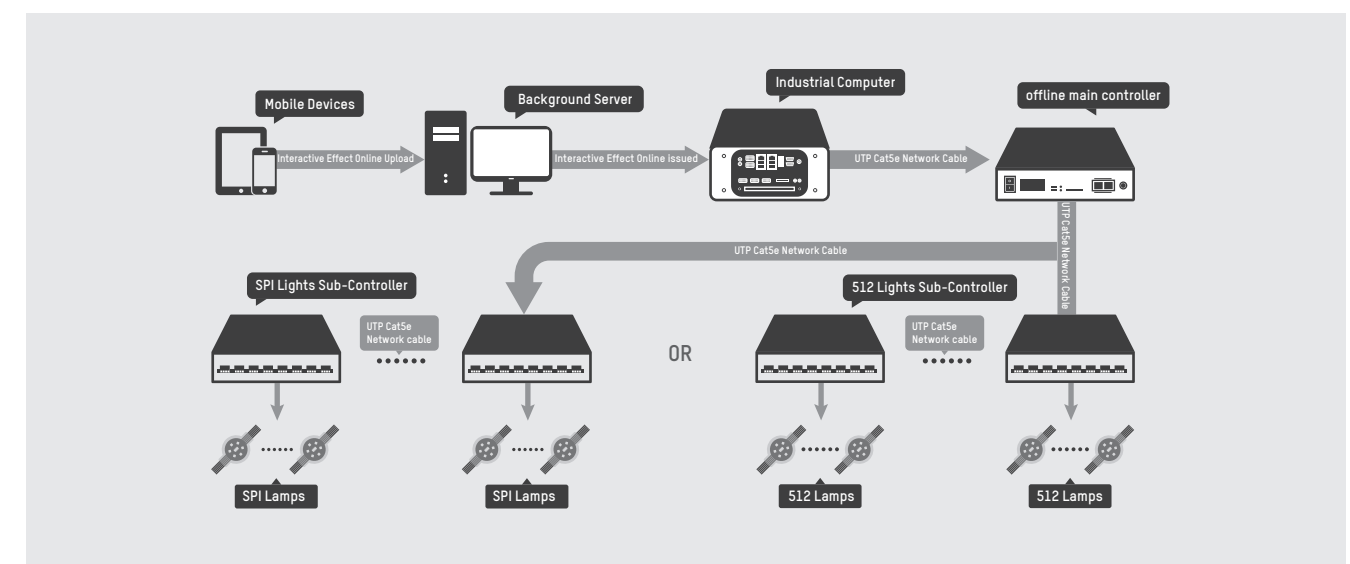

Pavements in the park

Pavements in the city

System framework

SHAKE AND VOICE INTERACTIVE CONTROL SYSTEM

Participater can voice control lighting via mobile phone, interacting with lighting by wechat shaking program, this application system is suitable for landscape pools, rivers, lightitng sculptures etc.

System Feature

- Easy way to participate
- Easy to implement and low cost
- Strong project compatibility

Application scenario

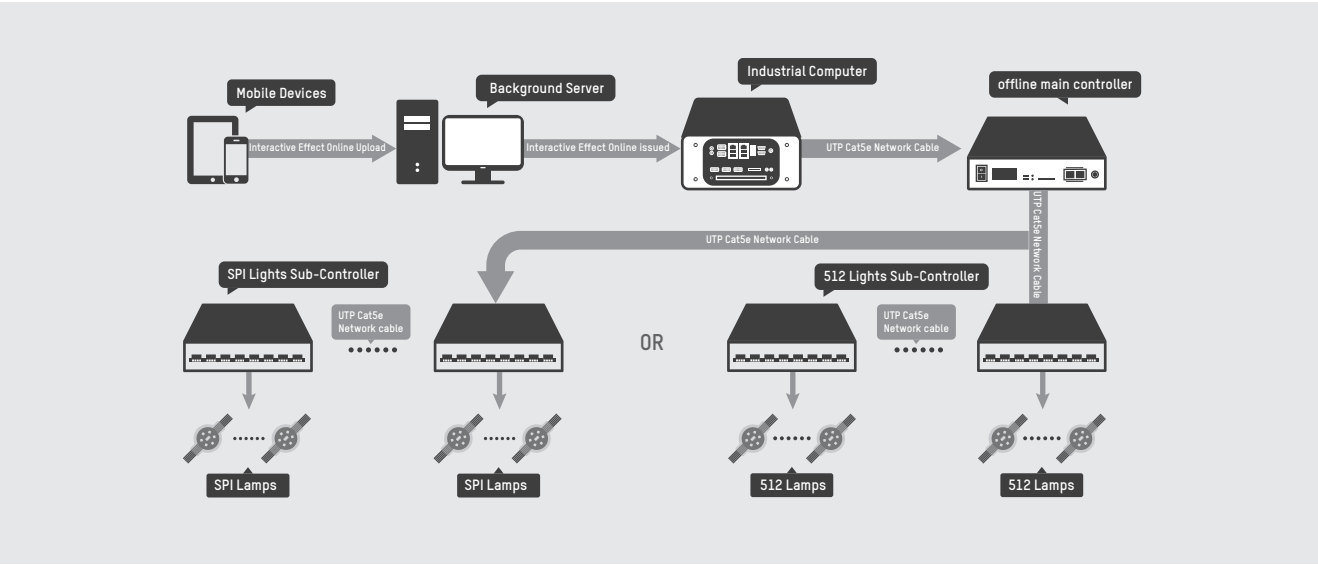

Landscape pool

Lighting Sculpture

System framework

SMART INTERACTIVE LIGHTING CONTROL SYSTEM BY MOBLIE

The mobile phone intelligent interactive lighting control system is based on mobile Internet technology, which realizes the real-time interaction between people and lights. Participants only need to enter the system through their mobile phones, and the on-site lighting effects will change in real time according to their operations on the mobile phones. For example, participants can choose their favorite lighting effects, and also support real-time DIY painting or sending blessings. The system supports multiple people to participate at the same time, increases the fun of interaction and supports customized services, and the interaction effect can be planned based on the theme of the scene.

System Feature

- Mobile phone scan code to participate in interactive customizable charging system
- Strong project compatibility
- Easy to implement and low cost
- Strong sense of experience, multi-person interaction
- Can be used in combination with intelligent lighting management cloud platform

Application scenario

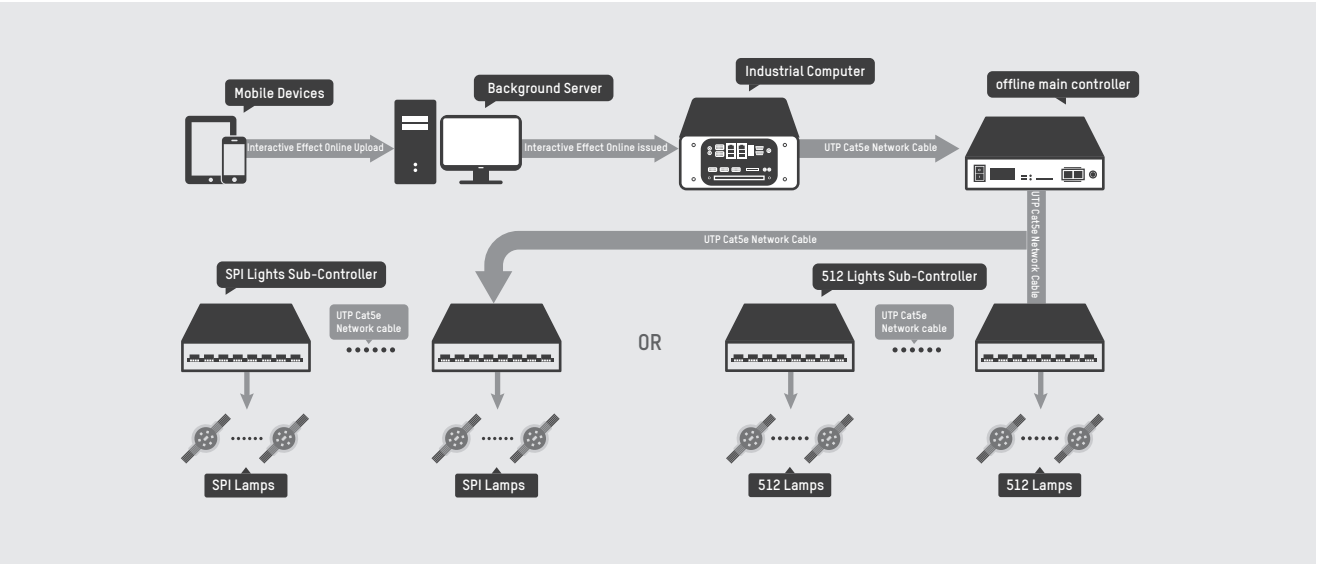

Cultural and Creative Park

Outdoor Media Wall

System framework

GOLF INTERACTIVE CONTROL SYSTEM

The lighting control system can realize the interaction between light, golf ball and people. When the golf ball falls into a green, the green will be intelligently sensed and the preset lighting effect will be displayed. The greens in the course can display unique lighting effects individually, or multiple greens can be linked with each other, allowing customers to experience the fun of interactive lighting while playing and entertaining. The lighting control system can be widely used in various similar in the interactive scenes.

System Feature

- Support mobile phone real-time editing animation
- Animation lighting effects can be combined optionally
- Convenient operation and maintenance
- Support sound and photoelectric integrated linkage

Application scenario

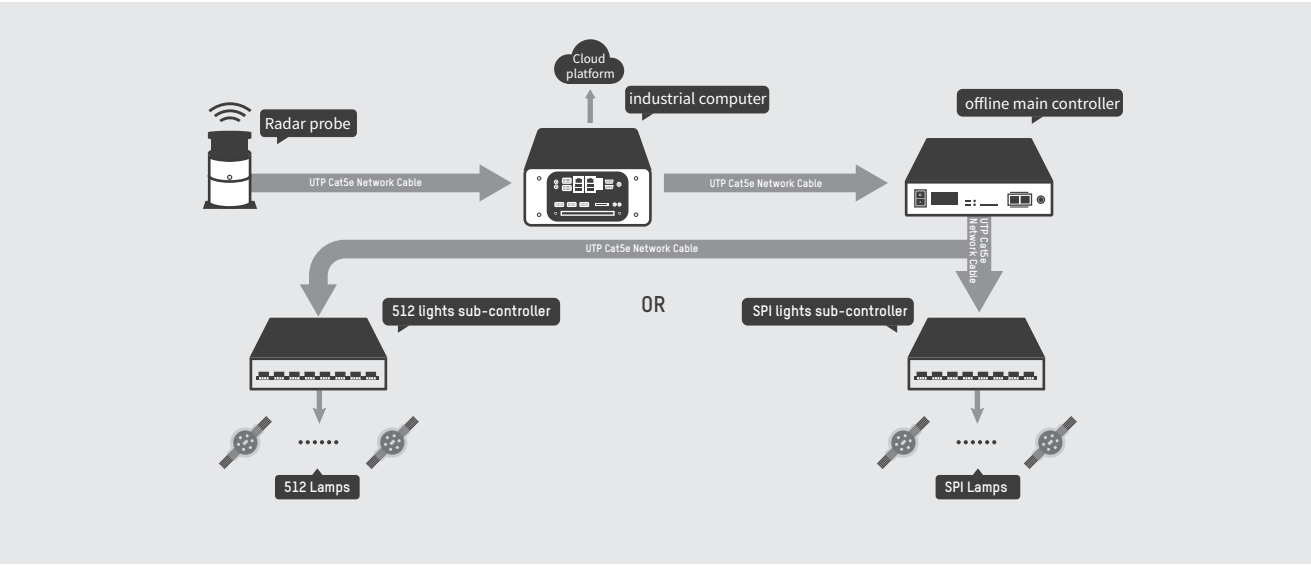

golf course

court

System framework

INFRARED INTERACTIVE CONTROL SYSTEM

The interactive modes of the mobile interactive control system can be divided into three categories: handwriting, background animation changes and animation selection and distribution, support for the customization of official accounts or web interactive modes; interactive effects and interactive animations support customization.

System Feature

- low cost, high cost performance
- High sensitivity
- easy to install

Application scenario

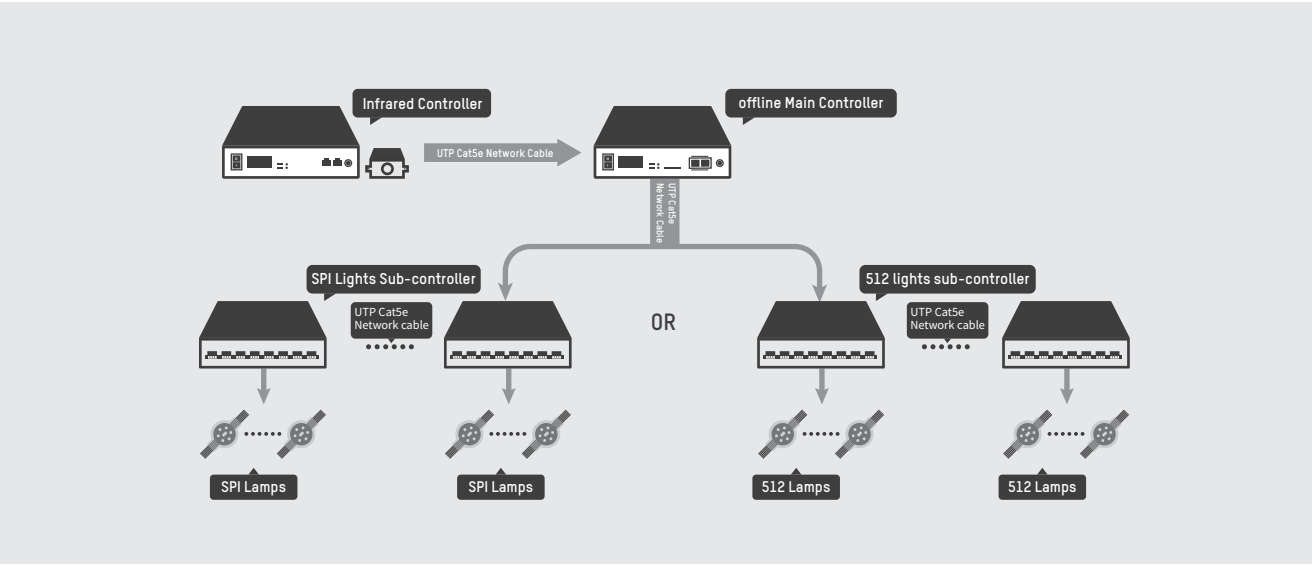

The Pedestrian stairs

Lighting sculpture

System framework

VOICE INTERACTIVE CONTROL SYSTEM

The use of the sound interactive control system can produce corresponding stave changes according to the changes in the sound, which can be played in the lamps in real time; and can realize animations with different effects according to the changes in the sound size, and the animation can be customized.

System Feature

- Collect sound decibels to achieve different animation effects
- Animation effects can be customized
- The animation effect changes in real time according to the sound

Application scenario

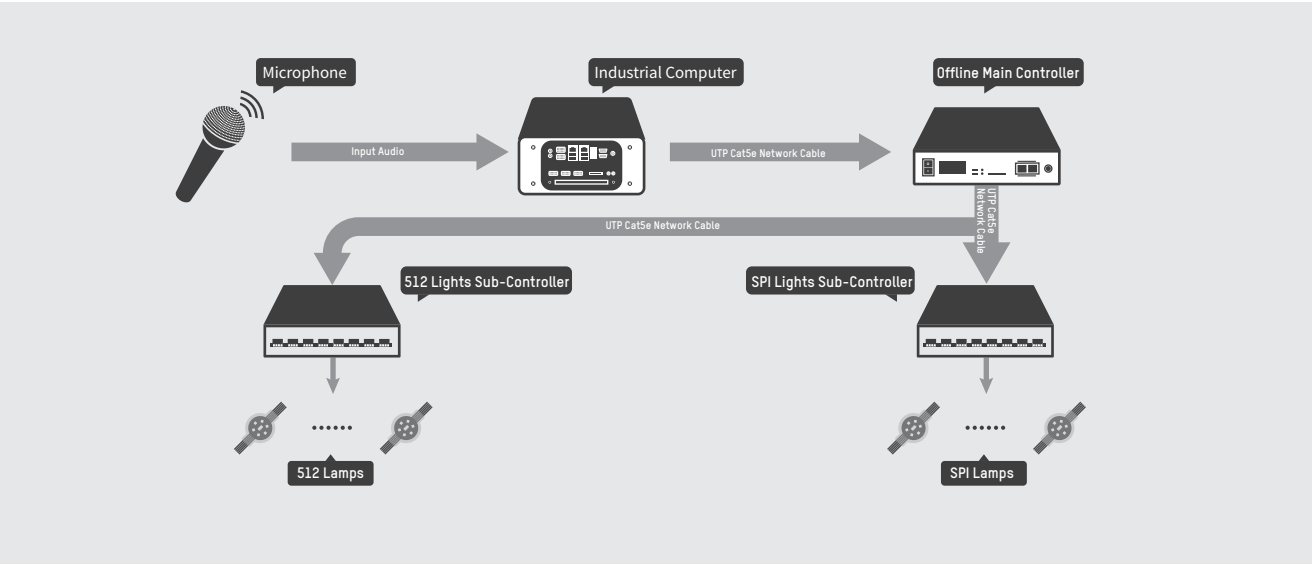

Scenic Tunnel

Lighting show

System framework

FERRIS WHEEL ROTATING CONTROL SYSTEM

The Ferris wheel control system needs to be used in conjunction with an industrial computer, with a maximum load of 120,000 points; it uses Ethernet interface and UDP network protocol to connect with the lower-level controller, and the effect can be achieved during the rotation of the Ferris wheel. The animation remains unchanged, and the animation effect can also be customized.

System Feature

- The Ferris wheel rotates, and the animation is adaptively displayed
- low cost, high cost performance
- strong sense of vision

Application scenario

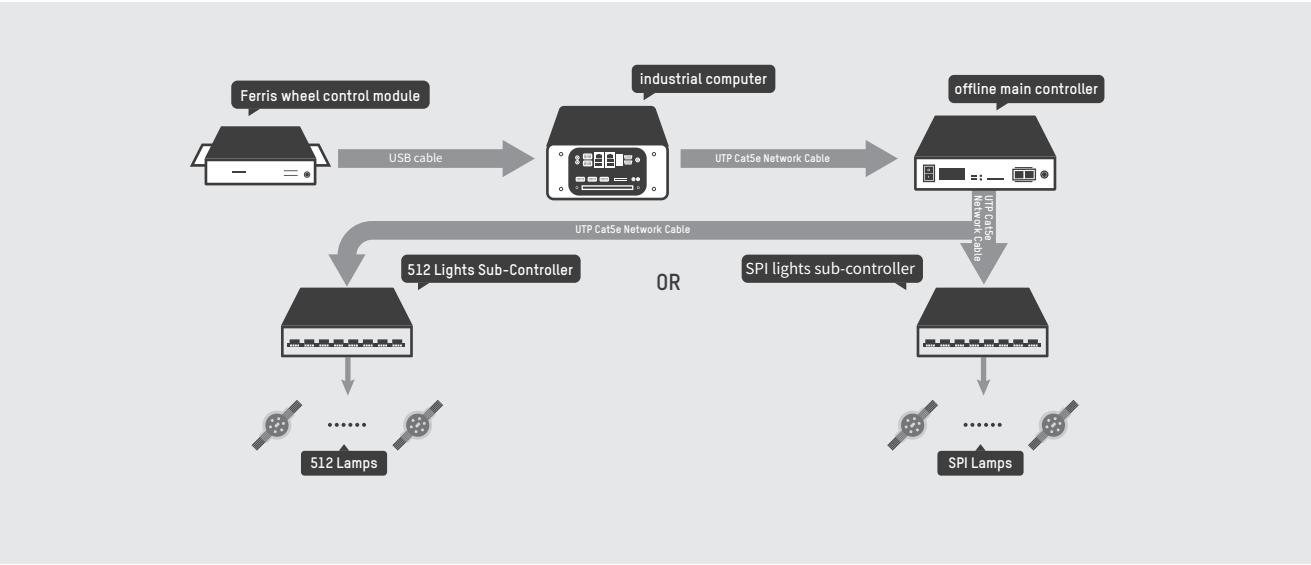

Ferri Wheel

Ferri Wheel

System framework

ENVIRONMENTAL INTERACTIVE CONTROL SYSTEM

The interactive control system can be combined with the Internet control system to collect real-time environmental factors, such as wind speed, temperature, Pm2.5, etc., analyze it through the intelligent algorithm developed by YD Corporation, and upload the data to the cloud to realize real-time monitoring of the environment; You can also control the content of light animation in real time according to the analysis results.

System Feature

- Real-time detection of monitoring data
- Real-time interaction between environment and lighting effects

Application scenario

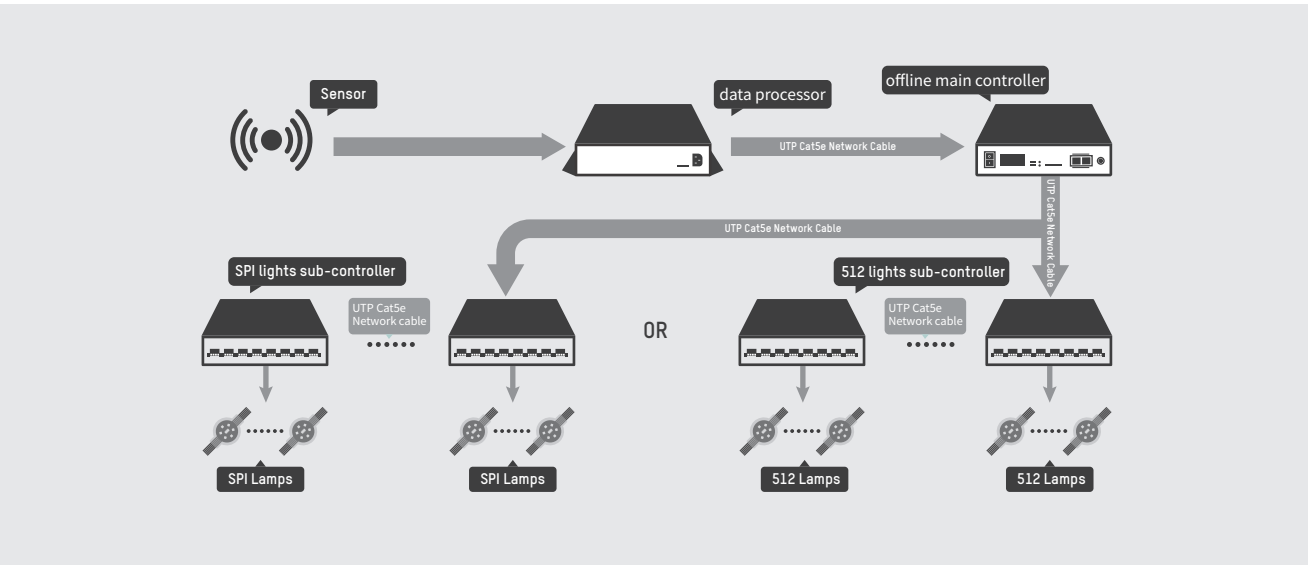

Wall Thermometer Display

Building Screen

System framework

BICYCLE INTERACTIVE CONTROL SYSTEM

The system controls lighting effects through bicycles and supports multiple interactive modes (group competition, single-player competition, cooperative mode, etc.) with strong sense of experience, entertainment and competition

System Feature

- Strong sense of action experience
- strong sense of entertainment competition

Application scenario

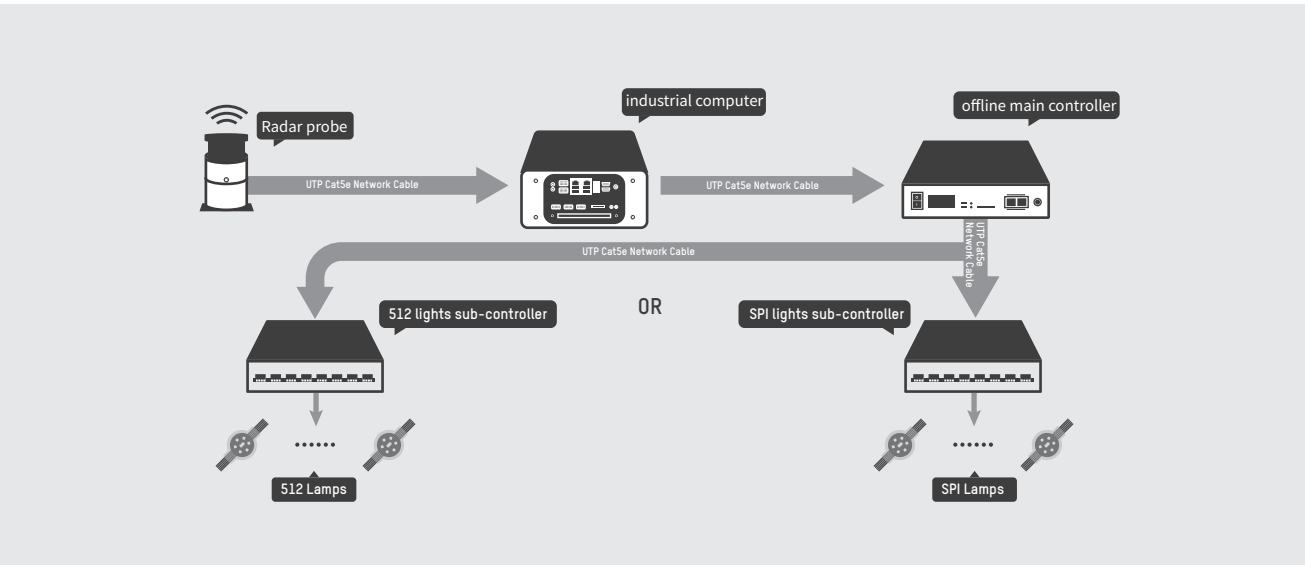

Park

Intelligent control large screen

System framework

SOMATOSENSORY INTERACTIVE CONTROL SYSTEM

Somatosensory Interaction can be not only used for ground screen, but also facade screen. When people move in the area of sensor, specific animation will be shown on the screen. The animation can be customized. The interaction can be participated by many people, and they will have good interactive experience.

System Feature

- Excellent real-time and tracing performance
- The lighting effect can be changed in real time as people's body movements.

Application scenario

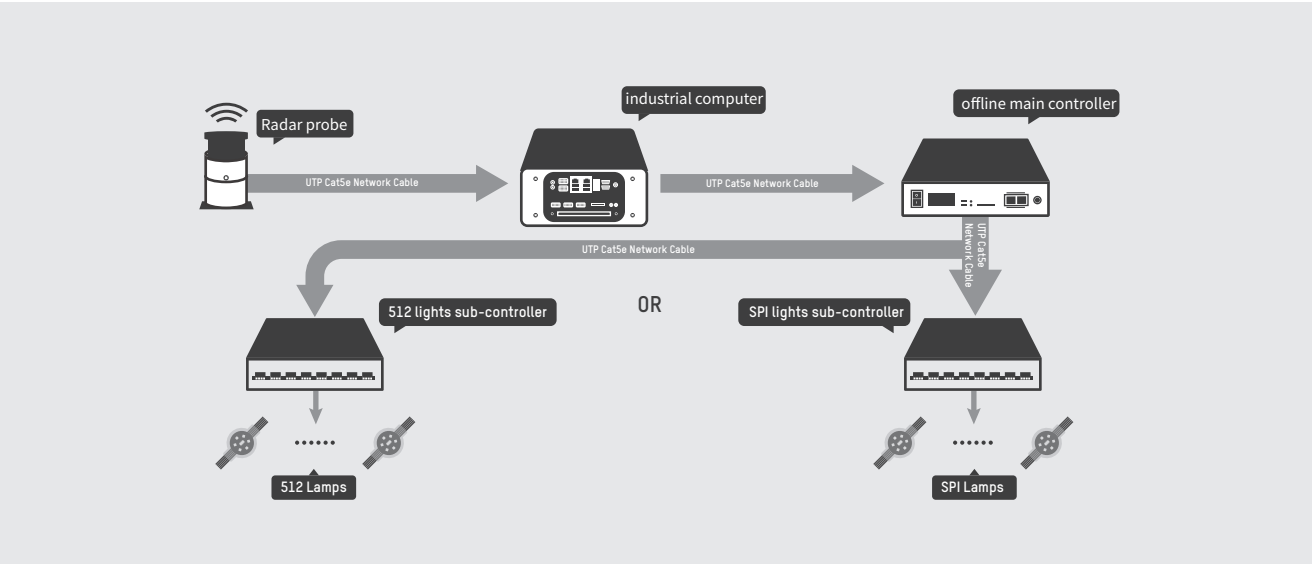

Building facade

LED Display

System framework

Underground Led Screen Interactive Control System

Interactive glass wall

CLASSIC INTELLIGENT CONTROL SYSTEM

SINGLE CONTROL SYSTEM

XS03 is used as an online and offline integrated controller, 8 ports output, each port maximum load is 512 points, single control, no cascade connection. SD card storage, external remote control, can realize playback segment selection, brightness adjustment, speed adjustment, built-in animation test program and other functions, which greatly meets the various needs of customers in application and debugging.

XS04 is used as an online and offline integrated controller, 8 ports output, output standard DMX512 protocol signal, each port maximum load is 170 points, single control, not cascading. SD card storage, external remote control, can realize playback segment selection, brightness adjustment, speed adjustment, built-in animation test program and other functions, which greatly meets the various needs of customers in application and debugging.

System Feature

- Suitable for small projects
- Main and extension integrated, easy to use
- Single SPI device can control 4096 pixels
- Single DMX512 device can control 1360 pixels

Application scenario

Underground Led Screen Interactive Control System

Sculpture Lighting of Zhuhai the pearl of the sea

OFFLINE CONTROL SYSTEM

Conventional offline master control, the lower level can connect to the SPI or DMX512 lamp controller through the RJ45 network port; with the infrared remote control, it can realize the playback segment selection, brightness adjustment, speed adjustment, and recall test programs; the controller can be modified by the remote control The internal time can play offline files with a set timing. Support the overall address writing of DMX512 lamps.

System Feature

- Offline can control 120,000 pixels
- Simultaneous control of SPI and DMX512 lamps
- It has the functions of choosing different animation, adjusting brightness and built-in animation test program.

Application scenario

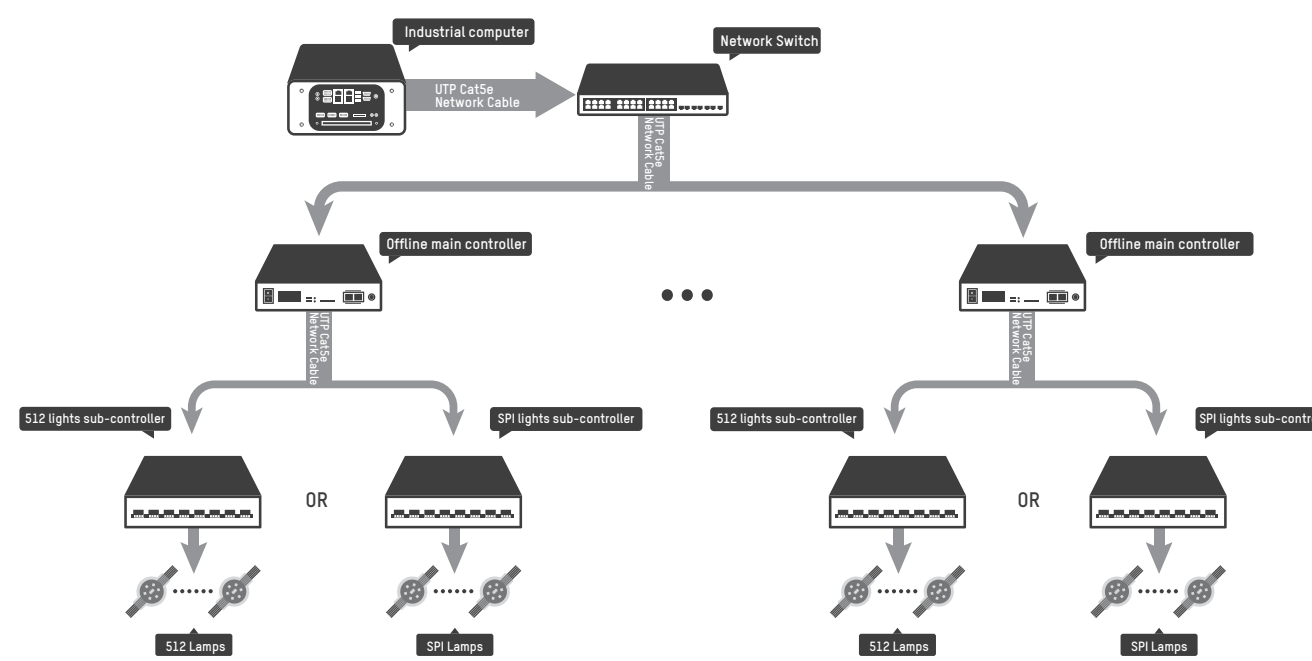

Hilton Hotel in Uzbekistan

Lighting Decoration of Gangqu Huanchegn River in Jiaxing City

ONLINE CONTROL SYSTEM

Conventional online control systems generally use industrial computer as the host, with superior performance and stronger stability. The animation is pre-stored on the industrial computer and can be replaced at any time. It can carry up to 1.2 million pixels. For larger load points, a large-scale centralized control system can be used, and a switch can be added between the industrial computer and the extension to improve system stability. Through different extensions, serial lamps and DMX512 lamps can be mixed in the same project at the same time.

System Feature

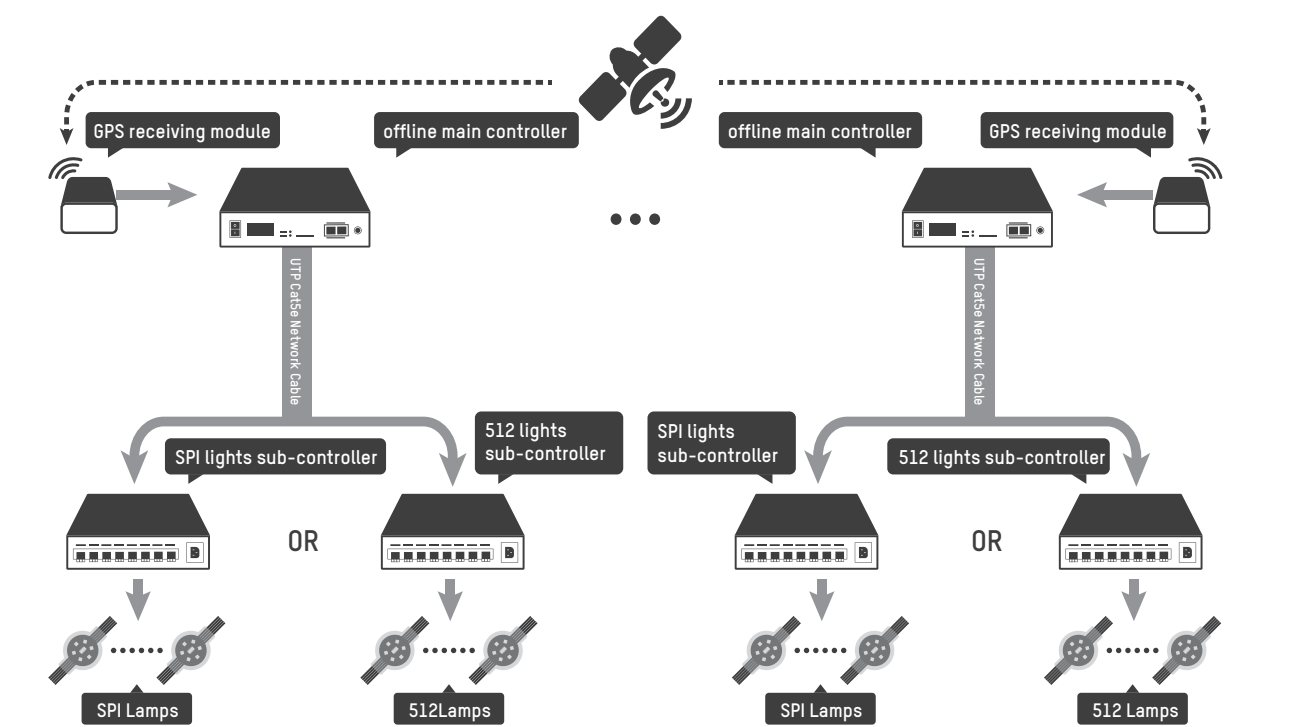

- Change the animation at any time
- Play in real time,a variety of playback scenarios can be set
- Synchronous playback of multiple nodes
- High stability

Application scenario

GPS SYNCHRONIZATION CONTROL SYSTEM

The satellite synchronization offline host controller can realize the global synchronization of multiple controllers by receiving satellite signals to meet the needs of multiple controllers synchronization between multiple buildings and cannot be connected. The controller can modify the internal time through the remote control, and can play offline files with a set timing.

System Feature

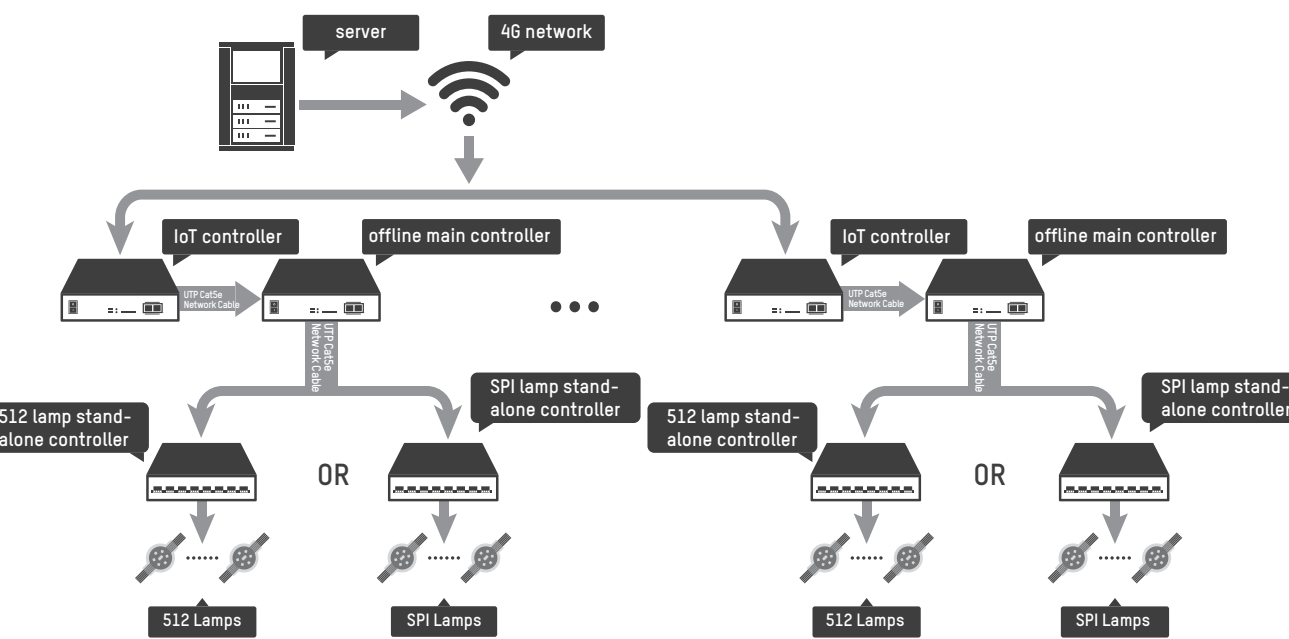

- Realize the linkage of multiple buildings
- Easy to change animation
- Low cost of control

Application scenario

IOT (INTERNET OF THINGS) CONTROL SYSTEM

IoT control system is a system based on IoT architecture which can help traditional controllers to achieve remote control. For example, we can do One-click changing animation effects in offline mode through IoT. We can set various animation playback strategies and also monitor the status of nodes online.

System Feature

- Apply 4G and 5G network technologies to issue instructions
- Real-time online monitoring the status of equipment
- Recall the animations pre-stored in the master controller and link them in real time
- Play strategy management

Application scenario

YD WAS AWARDED THE 45TH IES LIGHTING
AWARD ON AWARD OF DISTINCTION

Love Sculpture Interactive Project At Sakura Lake Sports Park of YD Illumination was awarded the 45th IES Lighting Award on Award of Distinction.

Awarding Spot(Fifth person from the left of first row: Mr.Xu Haisheng, Director of Foriegn Trade Department, YD Illumination.

<LD+A>

Will be + Certificate

On the evening of August 9th, local time in Boston, USA, the 45th IES Illumination Awards Ceremony was held at the Westin Waterfront Hotel in Boston. The "Love Sculpture at Sakura Lake Sports Park" project (product used: YD's customized double protection packaging 70 linear lights) which was participated by Hangzhou YD Illumination Co., Ltd. won the the highest award for this year's lighting award for IES (Award of Distinction), Hangzhou YD Illumination. The manager for the International Trade department, Mr. Xu Haisheng, attended the award ceremony to receive the award.

PRINCE ABDULLAH AL FAISAL STADIUM

Wake up the “Dynamic night”, light up the desert of happiness. YD 8000 m² LED media screen, restart the Prince Abdullah Al Faisal Stadium with splendid lighting, building the new landmark with cultural connotation and commercial value in Saudi Arabia.

DUBAI EXPO VISION PAVILION

This project was designed from the book “My Story” written by Sheikh Mohammed, vice-president of the United Arab Emirates. It used YD LED point light to highlight the design elements of the building facade with indirect lighting and embellish the visual details at night.

FUZHOU ICC SHENGLONG GLOBAL CENTER

Fuzhou ICC, the skyscrapers along the Minjiang River, it is the highest mansion in Fuzhou, built by the specialist in business office building, Shanghai ShengLong Group, designed by SOM, American famous design studio team, and supported by YD Illumination in the outdoor nightscape lighting.

HANGZHOU GONGWANG BRIDGE

Gongwang Bridge lighting is the major illumination project of Hangzhou 2022 Asian Games, the combination of sounding,lighting and electric concert bridge water curtain light show, create an immersive dream night scene to attract the people from all over the world for Hangzhou 2022 Asian Games.

WUHAN INTERNATIONAL EXPO CENTER

Wuhan International Expo Center is the international first-class convention center, meeting hall of Wuhan city, uses the YD LED light to focus on the center of Expo, highlighting the nightscape of landmark building.

DC BRIDGE, HYDERABAD, INDIA

DC Bridge is located in Hyderabad, India, with a length of 428.85 meters and a height of 37.5 meters. YD $\Phi 30$ point light source is used to light up the cable stays, and YD $\Phi 40$ is used to create a double-sided media screen. Real-time HD video shows the local characteristics and culture of India. It is the first bridge in India with LED light show. Well demonstrated the exclusive charm of LED for local people!

HILTON HOTEL IN TASHKENT UZBEKISTAN

The hotel is a landmark in Tashkent, UZ, in the front of it is Prime Minister’s office building, the hotel lighting combines fountain of square, which is much amazing and spectacularity.

THUMBAY HOSPITAL

Thumbay hospital

Thumbay hospital is a worl-class chain hospital in Aman, United Arab Emirates, The environment is much heat, and strong sunlight, But our YD high quality products still can be used very well in that environment, warm lighting decoreted elegant and quiet atmosphere for the hospital, especially the advertising screen on the main building of the hospital is much wonderful.

SAUDI ARABIA KING ABDUL AZIZ SPORTS CENTER

The King Abdul Aziz Sports Centre is a multi-purpose sports center located in Mecca, in the Sierra Arabian Mountains of western Saudi Arabia. The center's infield and outfield were equipped with YD lighting fixtures. The project was large and the construction period was short. 9 large cranes were arranged on site. The YD lighting engineers participated in the technical guidance throughout the whole process. After 3 months the project was completed with highest quality and adequate quantity. The project received high praise from customers.

N THERLANDS ROYAL KPN GROUP

Royal KPN N.V.is the largest mobile and fixed network operators in Netherlands.
YD LED products were built into its facade node structure and achieved soft lighting. YD also provided customer with tailored technical solution for long distance signal transission according to its special node structure.

THE ВДНХ ICE RINK, RUSSIA IN 2014

Ice Rink is the largest Ice Rink around the world. It is another great work of YD in Russia after Ice Rink lighting in Gorky Park. The lighting project was widely reported by Russian channels like RT and ВДНХ. YD products were successfully applied in extremely cold Ice Rinks in Russia (Lowest temperature reaching -40°C), which greatly testified superb cold resistance and waterproof performance of YD LED lights.

After great success of lighting application in Moscor's Gorky Park and ВДНХ Ice Rink, YD Double protection LED lights win good reputation in the Russian lighting industry.

FERRIS WHEEL IN HYDE PARK, LONDON, UK IN 2015

This project is located in Hyde Park, London, UK. Hyde Park is the largest royal park in UK. In the 16th century, King Henry VIII took it as Royal Park. The Ferris Wheel is one of the most attractive scenic spots in Hyde Park. This Ferris Wheel adopts the remote control system and GPS wireless synchronous control system self-developed by YD Illumination, therefore the lighting program can be changed. With lights on, the Ferris Wheel becomes the most dazzling pearl in Hyde Park.

BENTLEY SHOW ROOM FACADE LIGHTING IN DUBAI

Bentley Show Room Facade Lighting in Dubai

Located in Sheikh Zayed Road, Dubai, this Show Room is one of the largest Bentley Show Rooms in the world. This project adopts 157,900pcs YD Double Protection ϕ 20 point light source. All LED lights are installed behind the frosted glass wall, and fixed by aluminum panel. YD Double Protection LED lights can work well under 50 C environment.

SHANGHAI WORLD EXPO SKYLINE LIGHT

Expo Skyline Lighting Project as part of the opening ceremony of the 2010 Shanghai World Expo - part of the main venue lighting show, more than 40 buildings using YD double protection LED linear lights, with standard DMX512 control to achieve multiple buildings wireless synchronization linkage changes, and can cooperate with the central intelligent control system of the main venue to realize the changes of different scenes of the opening ceremony. During the World Expo, it was stable, received favorable comments from the governmental authorities, and won the World Expo landscape lighting quality lighting product award.

HANZHOU G20 SUMMIT

2016 Hangzhou G20 Summit Canal Section Project,
All use Hangzhou YD double protection LED point light source,

Won the 2016 Hangzhou G20 Summit Lighting Construction Contribution Award.

2016 Hangzhou G20 summit lighting construction contribution award and advanced collective award of lighting service guarantee.

BRICS XIAMEN SUMMIT IN 2017

Yuandang Lake Building Complex,Xiamen

Won the first "Egret Cup" "BRIC National Leaders
Xiamen Meeting Night Scene Enhancement Project"
Lighting Product Award.

Xiamen Yuet Garden Moonlight Ring

Jiageng Stadium

OLYMPIC SPORTS CENTER IN TIANJIN CHINA

At night, the stadium is illuminated by colorful lights, like a colorful cloth, the color changes with the animation graphics, the brilliant colors complement with each other, which is particularly eye-catching. With the light transformations in "water drop" stadium, near the two pavilions - swimming and diving hall, stadium lighting supplements with each others. The three halls are lighted with lighting through the YD intelligent DMX control system centralized control system, synchronization control, in the major festivals to achieve light synchronizations among the three halls. And it can fulfill the human interaction with the lights in the entire Olympic center. Not only that, the three hall can also be switched between synchronization control and individual control to meet the lighting needs of each venue in different scenarios.

SCO QINGDAO SUMMIT

In 2018, Qingdao SCO Summit Urban Landscape Lighting Project used Hangzhou YD's double protection LED point light source, and the number of point light sources was about 1.3 million.

Won the supplier of lighting quality products of Qingdao Summit of SCO

SHANGHAI BUND LANDSCAPE LIGHTING

In order to welcome the first China International Import Expo, Shanghai has carried out a comprehensive upgrade of the landscape lighting on both sides of the Huangpu River. This project adopted YD LED products to ensure excellent waterproof performance.

NORTH ZHEJIANG MEDICAL CENTER

The project adopts YD high-power wall washer, integrates the "silk" element into the nightscape lighting, fully considers the particularity of medical buildings, and uses the digital warm white color to express the rhythm of the building, set off the vitality of the building, and empower the people health .

SHANTOU TIMES SQUARE LIGHTING SHOW IN 2017

JIAXING HAINING AVENUE

Haining Avenue adopts YD Intelligent control platform to linkage control the lighting of 21 buildings, which is a one-million-level lighting project

HUNAN CHANGSHA FERRIS WHEEL

The Changsha Window of the World Ferris Wheel is located in Changsha World Window Theme Park, one of the first 4A-level tourist attractions in China. The Ferris wheel is 98 meters high, with a diameter of 81.6 meters and a speed of 15.2 minutes per revolution. The Ferris wheel project adopts the YD interactive sensing control system. As the Ferris wheel rotates, the animation displayed on the LED advertising screen remains in the programmed position, and the image position will not be changed due to the rotation of the Ferris wheel.

2016 KNPC HQ SCREEN IN KUWAIT

Adopted YD Double Protection $\Phi 40$ point light source to make a 2400 m^2 giant high protective media screen, it created a unique architecture with curved shape. It is the desert climate in Kuwait, with strong UV radiation, the highest temperature can reach 52 $^{\circ}C$. YD LED products are the best choice for this project because of the advantages of Anti-UV and they can work well under an extreme high and low temperature condition.

TAIWAN ACER ADVERTISING LED BOARD

The ACER advertising screen is the third led screen project used YD products in Taipei. Previously, Taiwan's Pingtung Railway Station Dawushan Star Square, Pingtung Dapeng bay water curtain lighting show, Breeze Xinyi Mall, Dongyang Business Group LED Screen and some other projects also have achieved stable and successful working.
